Lambois

Programme

Mapping vers DCAT (and co)

Rappel

- **Décloisonner le monde purement « geo » du monde extérieur (de la donnée ouverte par exemple)**
- Construire des ponts entre les communautés
- **Savoir exporter les métadonnées (souvent inspire) existantes**

Copyright Miss Globe & Mr Cube:
Frans Knibbe, Geodan

Intervention prévue au Geodatadays 2023

DCAT

Travail sur mapping avec DCAT data.gouv

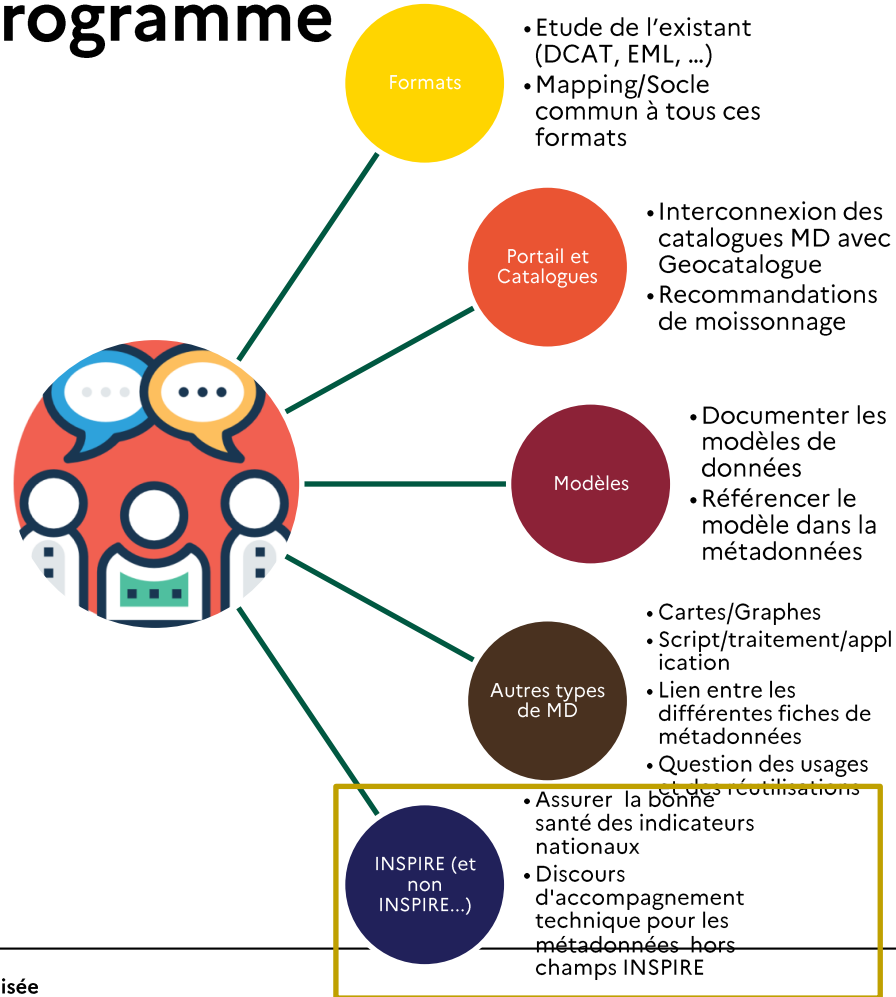

- <https://github.com/cnigfr/metadonnee/issues/22>
- Des éléments non considérés :
 - Acronyme ne sera pas pris en compte dans le mapping
 - Identifiant distant ne sera pas ajouté (déjà identifiant)
- Des bonnes questions à se poser
 - URL de consultation sera renseigné pour venir remplacer l'élément autre lien dans le mapping. Cet élément sera préconisé pour assurer le lien vers la fiche de métadonnée d'origine -> La question se pose du format/négotiation de contenu éventuel. [Lien vers la métadonnée d'origine #24](#)
 - Licence ne sera pas considéré au niveau Dataset
 - Titre (de la distribution) pourrait être ajouté mais un élément équivalent (name) est souvent utilisé pour préciser le nom des couches de la distribution WMS -> Discuter que faire dans ce cas, est-ce une bonne pratique à conserver ? [Titre de la Distribution #25](#)
- Des ajouts :
 - Fréquence de mise à jour sera ajouté au mapping.
-> La question se pose du vocabulaire utilisé et de la correspondance avec les vocabulaires courants actuellement. [\[fréquence de mise à jour\] Vocabulaire à utiliser #23](#)
- Les discussions sont à poursuivre concernant les autres éléments.

Interopérabilité sémantique

- **Besoin pour chaque domaine de valeur de considérer la liste de valeur autorisée.**
- **Exemple sur la fréquence de mise à jour**

| INSPIRE | Dublin Core | Europe |
|-------------|---|------------------------------------|
| Annually | Annual [freq:annual] | annual |
| As needed | XXX | XXX |
| Biannually | Semiannual [freq:semiannual] | semiannual |
| Continual | Continuous [freq:continuous] | continuous or continuously updated |
| Daily | Daily [freq:daily] | daily |
| Fortnightly | Bimonthly [freq:bimonthly] | bimonthly |
| Irregular | Irregular [freq:irregular] | irregular |
| Monthly | Monthly [freq:monthly] | monthly |
| Not planned | XXX | never |
| Quarterly | Quarterly [freq:quarterly] | quarterly |
| Unknown | XXX | unknown |
| Weekly | Weekly [freq:weekly] | weekly |
| XXX | Triennial [freq:triennial] | triennial |
| XXX | Biennial [freq:biennial] | biennial |
| XXX | Three times a year [freq:threeTimesAYear] | three times a year |
| XXX | Semimonthly [freq:semimonthly] | semimonthly |
| XXX | Biweekly [freq:biweekly] | biweekly |
| XXX | Three times a month [freq:threeTimesAMonth] | three times a month |
| XXX | Semiweekly [freq:semiweekly] | semiweekly |

ENHANCING ACCESS TO EUROPEAN SPATIAL DATA

INSPIRE GEOPORTAL

Home High-Value Data Sets Thematic Data Harvesting status Find out more about

Welcome to the INSPIRE Geoportal

The INSPIRE Geoportal is the central European access point to the data provided by EU Member States and several EFTA countries under the INSPIRE Directive. The Geoportal allows:

- monitoring the availability of INSPIRE data sets;
- discovering suitable data sets based on their descriptions (metadata);
- accessing the selected data sets through their view or download services.

The metadata used in the Geoportal are regularly harvested from the discovery services of EU Member States and EFTA countries. The status of harvesting is available [here](#).

Feedback regarding the functionality as well as data set availability is welcome [here](#).

High-Value Data Sets

The application provides an overview and access to geospatial high-value datasets and other core data (including priority data sets for eReporting).

[Browse](#)

INSPIRE Thematic Data

The application displays the availability and provides access to all EU MS data sets falling under the scope of INSPIRE Directive filtered by data themes and countries (i.e. Annex I, II and III).

[Browse](#)

INSPIRE Reference Validator

The validator application is to help data providers, solution providers and national coordinators to check whether their data sets, network services and metadata meet the requirements defined in the INSPIRE Technical Guidelines. The validation tests are based on the Abstract Test Suites agreed between Member States and the Commission in the INSPIRE Maintenance and Implementation Group.
