Joint Research Centre

## Data Driven Economy in Central and Eastern Europe. Challenges and Perspectives

Alexander Kotsev, Vlado Ceti, Jean Dusart

# Organisers

## Objectives

- 1) Discuss cross-cutting issues relevant to the data economy
- 2) Position SDIs within the broader context of the data economy
- 3) Represent the position of different actors
  - International organisations
  - Public sector authorities
    - Open data
    - SDIs
  - Users
- 4) Identify success stories and learn from each other
- 5) Explore synergies and Network

## Joint Technical report

- Document best practices
- Summarise key findings
- Published as open access
  - ISSN
  - Disseminated through the EC Publications office

## Context

### Focus on Enlargement and Integration countries

- The data economy is contribution to an increasing share of GDP
- No quantifiable evidence on the state and perspectives of the data driven economy in European neighbouring countries.
- Some notable islands of success
  - Moldova Open Data initiative,
  - globally recognized open source software created in Ukraine
- if re-used and extended, can further foster innovation and intensify growth.
